master s thesis from the year 2021 in the subject english language and literature studies linguistics grade 65 00 university of leicester course applied linguistics and tesol language english abstract this study aims to determine the perceived mutual intelligibility of regional indian english rie accents from the standard indian english sie speakers perspective find out if there is attitudinal bias among young sie speakers towards rie speakers based on the english medium vernacular medium em vm divide and if the bias has any effect on the perceived intelligibility of rie accents this study aims to look into the phenomenon of bias as well however as bias is an implicit characteristic that is generally kept veiled from public scrutiny it could not be incorporated in the questionnaire for analysis as a result it was not included overtly as a research question either primarily also because determining the

acceptability of an accent a main research question implies looking for instances of stereotyping and stereotyping creates the very conditions for bias to grow and fester hence as bias is a result of a process this study will attempt to statistically shed light on this subject through data interpretation accents tell the story of who you are in terms of being the most revealing predictors of a speaker's geographical origins and social background including perceived educational levels professional status social class and identity these social and acoustic aspects of an accent often give rise to stereotypes and value judgements of the speakers and or groups especially if it differs in noticeable ways from established pronunciation patterns this leads to negative reactions or language attitudes that are reflected in systemic discrimination in areas of education and employment it can be argued that to eschew this discriminatory practice of stereotyping non native or foreign accents the intelligibility construct emerged as early as 1900 Henry Sweet as an alternative egalitarian I2 pronunciation target option for I2 learners hence intelligibility of I2 speech pattern found itself to be one of the main concerns of accents in the study of accents the object of study is not so much the speaker's speech style but the listener's hearing and understanding Munro makes a further salient point by noting that the effect of accents on communication can be best judged by an unsophisticated listener to see how understandable I2 speakers are within their community this kind of judgement data of listeners perceptions are considered to be gold standard

academic paper from the year 2020 in the subject psychology work business organisation grade 10 msb medical school berlin hochschule für gesundheit und medizin language english abstract toxic leadership is a serious issue that can certainly have many different facets and causes for today management is still an area that is fairly dominated by male employees this paper aims to take a closer look at the socio cultural causes of toxic leadership that could lie in the role of the traditional man i ask myself the question how does our cultural understanding of how male leadership should look influence how leaders deal with subordinates could find expression in toxic leadership this paper introduces the reader to a recently proposed organizational culture called masculinity contest culture mcc where negatively expressed masculinity norms serve as a fertile breeding ground for toxic leadership furthermore i introduce another study that connects toxic leadership with the social dominance orientation sdo and status enhancement motive which could be closely related to the mcc the last study deals with gender differences aligning with characteristics of follower groups from Padilla et al 2007 toxic triangle and gender differences in the perception of toxic leadership they found that women view toxic leadership more negatively as well as detect significantly more subtle forms of toxic leadership than men
