the poetics of empowerment in david mitchell s novels combines the investigation of david mitchell s novels with the introduction of a new critical concept to literary studies empowerment aiming to situate and establish empowerment firmly within the context of literary studies it offers the first framework and definition for reading fictional texts with the lens of empowerment and applies it in the analysis of discourse the fictional characters and the role of the reader in mitchell s novels drawing on narratological analysis cognitive

approaches to literature and reader response theory it features close readings of *Cloud Atlas* (2004), *Black Swan Green* (2006), and *The Thousand Autumns of Jacob de Zoet* (2010) and dissects the author's strategies, poetics, and agenda of empowering fiction. This book argues for an inherent, indissoluble connection between empowerment and the telling of stories and demonstrates how literary studies can benefit from a serious engagement with empowerment and how such an engagement can stimulate new responses to fiction and put literary studies in conversation with other disciplines.

Ginnodo demonstrates that employee empowerment is more than theory and buzzword. The book shows how leading companies improve the performance of employees and managers as well as customer satisfaction, costs, competitiveness, and the bottom line by giving individuals and teams the power to take action.

Contained Empowerment and the Liminal Nature of Feminisms and Activisms examines the processes by which activist successes are limited and outlines a theoretical framing of the liminal and temporal limits to social justice efforts as contained empowerment with a focused lens on the third wave and contemporary forms of feminism. The author investigates feminist activity from the early 1990s through responses and reactions to the overturning of *Roe v. Wade* in 2022 and contrasts these efforts with anti-feminist, white-supremacist, and other structural normalizing efforts designed to limit and repress women's gendered and reproductive rights. This book includes analyses of celebrity activism, girl power, transnational feminist NGOs, digital feminisms, and the feminist mimicry applied by practitioners of neoliberal and anti-feminism. *Victoria A. Newsom* concludes that the contained nature of feminist empowerment illustrates how activists must engage directly with intersectional challenges and address the multiplicities of structural oppressions in order to breach containment.

Challenging the Stigma of Mental Illness offers practical strategies for addressing the harmful effects of stigma attached to mental illness. It considers both major forms of stigma: public stigma, which is prejudice and discrimination endorsed by the general population, and self-stigma, the loss of self-esteem and efficacy that occurs when an individual internalizes prejudice and discrimination. An invaluable guide for professionals and volunteers working in any capacity to challenge discrimination against mental illness, it contains practical worksheets and intervention guidelines to facilitate the implementation of specific anti-stigma approaches. Authors are highly experienced and respected experts in the field of mental illness stigma research.
